A PROMISE MADE:

Quality, Affordable Health Care for Every American Citizen.
House Republicans have passed a bold health care plan that provides better coverage, more choices, lower premiums and protects people with pre-existing conditions – all while cutting the deficit and providing $1 trillion in job creating tax relief.

The American Health Care Act is the first step in the effort to improve health care for our families. It puts patients and doctors back in charge of health care. It eliminates expensive mandates and empowers individual states to reduce health care costs.

Americans deserve a better, more affordable health care system.

“It makes health care more affordable, it takes care of our most vulnerable, and it shifts power from Washington back to the states, and most importantly, back to you, the patient.”

– SPEAKER PAUL RYAN, 5/4/17

Call Congressman Brian Mast at 1-800-756-6191
Thank him for keeping his word and fighting for the health care we deserve.
